9/14/2018 Java

Pieter I

This is an installation guide for the Oracle Java SE Development Kit on Ubuntu.

Adding the PPA

First add the Oracle Java SE repository:

```
$ sudo add-apt-repository ppa:webupd8team/java
```

It will ask you to confirm adding the repository. Press enter to do so.

The output should look something like this:

```
Oracle Java (JDK) Installer (automatically downloads and installs Oracle JDK7 / JDK8 / JDK9).
There are no actual Java files in this PPA.
Important -> Why Oracle Java 7 And 6 Installers No Longer Work:
http://www.webupd8.org/2017/06/why-oracle-java-7-and-6-installers-no.html
Ubuntu 16.10 Yakkety Yak is no longer supported by Canonical (and thus, Launchpad and this PPA).
The PPA supports Ubuntu 17.10, 17.04, 16.04, 14.04 and 12.04.
More info (and Ubuntu installation instructions):
 for Oracle Java 7: http://www.webupd8.org/2012/01/install-oracle-java-jdk-7-in-ubuntu-via.html
- for Oracle Java 8: http://www.webupd8.org/2012/09/install-oracle-java-8-in-ubuntu-via-ppa.html
Debian installation instructions:
- Oracle Java 7: http://www.webupd8.org/2012/06/how-to-install-oracle-java-7-in-debian.html - Oracle Java 8: http://www.webupd8.org/2014/03/how-to-install-oracle-java-8-in-debian.html
Oracle Java 9 (for both Ubuntu and Debian): http://www.webupd8.org/2015/02/install-oracle-java-9-
in-ubuntu-linux.html
Oracle JDK 9 is now considered stable. There are currently only 64bit builds (no other builds are
available for download: http://www.oracle.com/technetwork/java/javase/downloads/index.html )
More info: https://launchpad.net/~webupd8team/+archive/ubuntu/java
Press [ENTER] to continue or ctrl-c to cancel adding it
```

Then update the package list:

```
$ sudo apt-get update
```

Install Java SE Development Kit 9

Install the Oracle Java SE Development Kit 9 (JDK 9) using the package manager:

```
$ sudo apt install oracle-java9-installer
```

Type y and enter to confirm.

You have to agree to the license agreement.

9/14/2018 Java

Press enter to agree.

Then accept the license terms as well. Use the left arrow key to select <Yes> and hit enter.

Set Oracle Java as default

If you have multiple versions of Java installed, you can use the following command to set the Oracle JDK 9 as the default.

\$ sudo apt install oracle-java9-set-default
